

**Current position** Assistant Professor of Evolutionary Ecology, University of Amsterdam, Inst. for Biodiversity and Ecosystem Dynamics

**Memberships** European Society for Evolutionary Biology | member  
 COST European Network in Chemical Ecology | management committee member  
 Netherlands Society for Evolutionary Biology | steering committee member  
 Dutch Origins Center | steering committee member  
 Amsterdam Center for Origins of Life | steering committee member  
 UvA Scientific Advisory Committee | member

## Degrees

**PhD** Humboldt University Berlin, Germany. Supervision: Prof. Matthias Hennig. Graduated *summa cum laude* 20 May, 2016.

**MSc** University of Amsterdam, The Netherlands. MSc in Biological sciences, track Ecology and Evolution, Graduated *cum laude* 30 November, 2011.

**BSc** University of Amsterdam, The Netherlands. BSc in Biology. Graduated 27 August, 2008.

## Research Experience

Mar 2022 – ongoing Assistant Professor of Evolutionary Ecology, University of Amsterdam, Inst. for Biodiversity and Ecosystem Dynamics

Jan 2021 – Feb 2022 **Research fellow Origins Center at University of Amsterdam**, Inst. for Biodiversity and Ecosystem Dynamics. Supervision: Prof. Astrid T. Groot.

Oct 2018 – Dec 2020 **Marie Curie postdoctoral fellow at University of Amsterdam**, Inst. for Biodiversity and Ecosystem Dynamics. Supervision: Prof. Astrid T. Groot.

Aug 2016 – Sep 2018 **Postdoctoral associate**, Department of Neurobiology and Behavior, Cornell University, Ithaca, NY, USA. Supervision: Prof. Kerry L. Shaw.

Aug 2012 - Dec 2016 **Guest researcher**. Museum für Naturkunde Berlin, Leibniz institute for evolution and biodiversity science, Berlin, Germany. GENART (functional genomics of speciation) project.

Aug 2012 - Oct 2015 **PhD research**. Humboldt University Berlin, Germany. Thesis title: *Acoustic communication, sexual selection, and speciation in field crickets*. Supervision: Prof. Matthias Hennig.

Jan 2011- Nov 2011 **MSc Research project** (60 ECTS) at the Stony Brook University (SBU), Stony Brook, NY, USA, in the department of ecology and evolution. Thesis title: *Adaptive Radiation and Morphological diversification in Salamanders and Lizards*. Supervision: Prof. John J. Wiens, Prof. Steph B. Menken

Mar 2010 - Jun 2010 **MSc Research project** (30 ECTS) at the VU University Amsterdam, Department of Animal Ecology. Thesis title: *Nutrient signaling: genomics underlying lipid metabolism pathways in the parasitoid wasp Nasonia vitripennis*. Supervision: dr. Merijn Kant (UvA), Prof. Jacintha Ellers (VU), dr. Bertanne Visser (VU).

Apr 2008 - May 2008 **BSc Research project** (18 ECTS) at the **University of Amsterdam** within the Institute for Biodiversity and Ecosystem Dynamics (IBED). Thesis title: *Adaptive speciation appraised: how disruptive selection forces sympatric populations of the two-spotted spider mite to diversify*. Supervision: dr. Martijn Egas.

### Teaching Experience (BKO awarded 8-Feb-2024)

#### Track Coordination

2025 – Present MSc Biological Sciences General Biology Track coordinator backstop

#### Course Design

2022 Current Topics in Biology, MSc Biological Sciences, track General Biology

#### Courses | role

2025 – Present Evolution of Plasticity and Learning | lecturer

2024 – Present Analysis & Modeling Lab, MSc Earth Sciences | module design, lecturer

2024 – Present Psychobiologie Literature Review | advisor

2023 – Present Van Neuron tot Gedrag | lecturer

2022 – Present Current Topics in Biology, MSc Biological Sciences, track General Biology | coordinator, lecturer

2022 – 2024 Keystone Project II: The Resilient Environment, BSc Biology | scientific advisor

2020 – Present Evolutiebiologie, BSc Biology | lecturer

2019 - present Neurobiology and Behavior, BSc Biology | lecturer

2019 - 2020 Evolution and Behavior, BSc Biology | lecturer

2019 - Present Ecogenomics, BSc Biology | lecturer

#### Supervised students

*PhD students* Hayden Waller (Cornell University, start: September 2016, defense: September 16, 2022), Elise Fruitet (UvA, start: 2018, defense: 27 September 2023), Jiajia Zhao (UvA, start: 2024), Pietro Gadaleta (UvA, start: 2025).

#### *BSc/MSc students*

2025/2026 Moya Lieffering (MSc, ULeiden), Jesper Zonneveld (HBO, HU Leiden), Stan van Dijk (MSc, UvA), Octavio Cruces Guarderrama (MSc, UvA), Jeppe Vernooij (MSc, UvA)

2024/2025 Charissa Claessens (MSc, UvA), Madelon Grim (MSc, UvA), Alex McKenna (MSc, Univ. Lille), Finn Verhoef (MSc, UvA), Daniel Nijman (BSc, UvA), Michelle Steenbergen (BSc, UvA), Monica Mooijer (BSc, UvA), Miel Houtenbos (BSc, UvA), Mattis Steenweg (BSc, UvA), Borai Lodewijk (BSc, UvA), Sophia Mulder (BSc, UvA, September – February), Maarten Ooijevaar (Leiden Applied University, September – July)

2023/2024 Ellie Willson (MSc, UvA, February – July), Emma Diepeveen (MSc, UvA, February – July), Ihnen Lecat (MSc, ULille, February – July)

|           |                                                                                                                                                                                                                                                               |
|-----------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 2022/2023 | Regina Marquez (MSc, UvA, February – August), Elea Cavigneaux (MSc, UvA, February – August), Erdem Eren (BSc, Turkiye)                                                                                                                                        |
| 2021/2022 | Arie Ebbenhorst (Aeres Applied University, February – May), Jerry Schouten (BSc, UvA, September – December), Canberk Koroglu (BSc, Gebze Technical University Turkiye, December 2022 – March 2023)                                                            |
| 2020/2021 | Eline de Vries (MSc, UvA, Feb - July), Wout van der Heide (MSc, UvA & Cornell University, Jan - August), Ekaterine Kikodze (BSc, Radboud University, May – August), Lotta Vaskimo (MSc, Leiden University, September 2021 – May 2022), Luka Rieger (MSc, UvA) |
| 2019/2020 | Thomas Rietbergen (BSc, UvA, Apr – Jun), Max Boot (BSc, UvA, Apr – Jun)                                                                                                                                                                                       |
| 2018/2019 | Elise Fruitet (PhD, UvA, 2019 – present), Arlet Culhaci (University of Applied Sciences Leiden), Robin Moene (BSc, UvA, Apr – Jun)                                                                                                                            |
| 2014      | Carolin Geelhaar (MSc) & Anna Lübke (BSc), Humboldt University Berlin                                                                                                                                                                                         |
| 2013      | Rafael Block (BSc), Humboldt University Berlin                                                                                                                                                                                                                |

### Teaching Assistant and Other teaching experience

|                     |                                                                                                                                             |
|---------------------|---------------------------------------------------------------------------------------------------------------------------------------------|
| Nov 2015 - Jul 2016 | Homework class teacher. Het 4de Gymnasium Amsterdam, The Netherlands.                                                                       |
| 2014, 2015          | MSc course 'Bioacoustics', Humboldt University Berlin                                                                                       |
| 2013, 2014, 2015    | BSc course 'Aggressive behavior', Humboldt University Berlin                                                                                |
| 2012                | BSc course 'Evolutionary Genetics', University of Amsterdam.                                                                                |
| 2012                | Development of evolutionary genetics experiments for undergraduate education, University of Amsterdam                                       |
| 2010                | BSc course 'Genetics and Evolution', University of Amsterdam.                                                                               |
| 2008-2009           | Homework tutor. StudentsPlus.                                                                                                               |
| Sep 2007            | Course for high school education in life sciences at the University of Amsterdam (12 ECTS). Supervision: drs. Riny van Krieken (UvA – ILO). |
| 2004 – 2012         | Sailing and Windsurfing instructor, WSC Sloterplass, Amsterdam, The Netherlands                                                             |

|------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 2011 | Amsterdams Universitair Fonds – € 500                                                                                                                                                                                                                                     |
| 2011 | Stichting Dr. Hendrik Muller Vaderlandsch Fonds – € 700                                                                                                                                                                                                                   |
| 2018 | Marie Curie Individual Fellowship – € 181,000                                                                                                                                                                                                                             |
| 2020 | NWO NWA small project 1418.20.026 – € 150,000 (Role: subproject leader. € 50k awarded to our project in a co-application with Karen Bisschop and PIs of “predicting evolution” gamechanger of the Origins Center. Main applicant: Inge Loes ten Kate)                     |
| 2022 | NWO NWA small project 1418.22.013 – € 300,000 (Role: subproject leader. € 100k awarded to our project in a co-application with Astrid T. Groot and Sander G. van Doorn. Main applicant: Pedro Russo)                                                                      |
| 2023 | EU COST action 22102 E-NICHE: European Network in Chemical Ecology - €600,000 (Role: co-applicant, work group leader. main applicant: Anne-Genevieve Bagnères.).                                                                                                          |
| 2024 | Dutch Ministry of Education, Culture, and Science Starters Grant (€300,000, personal grant).                                                                                                                                                                              |
| 2024 | NWA ORC PRELIFE - Pathways, Reactions, and Environments leading to LIFE: An interdisciplinary approach (NWA.1630.23.013) – €6,750,000 (Role: subquestion leader during consortium forming, co-applicant, partner on two subprojects. Main applicant: Inge-Loes ten Kate.) |

### Professional service

#### Peer review

I review about twice the number of papers I (co)author each year and have reviewed for many titles, including: Axios Review, Behavioral Ecology and Sociobiology, Biological Journal of the Linnean

Society, Contributions to Zoology, Ecological Entomology, Ecology and Evolution, Entomologia Experimentalis et Applicata, Evolution, Evolution Letters, F1000, Genes, Journal of Evolutionary Biology, Journal of Insect Science, Molecular Ecology, PCI Evol. Biol., PLOS one, Proceedings of the Royal Society B, Systematic Entomology, Trends in Ecology and Evolution, Zoological Journal of the Linnean Society

#### Symposium/workshop organization

- 2015 Bioacoustics meeting in Zingst, Germany co-organizer
- 2020 Netherlands Annual Ecology Meeting co-convener
- 2021 Quantitative Trait Mapping Workshop at SILS, UvA
- 2022 – ongoing Soup lunch host, weekly institutional seminar at UvA.
- 2024 COST workshop on communication strategy for the E-NICHE project in Amsterdam (9 February)
- 2024 COST workshop on social media communication for the E-NICHE project in Prague (13 July)
- 2025 COST workshop on career development in Chemical Ecology for the E-NICHE project (23 May)
- 2025 COST annual meeting for the E-NICHE project in Evora (25-28 June)
- 2026 Origins Center annual meeting

#### **Programming Languages**

- R
- Python
- Bash

#### **Languages (ILR / CEFR)**

- Dutch: native (5 / -)
- English: academic/proficiency (4 / C2)
- German: proficiency (3 / C1)
- Spanish: advanced (2+ / B2)

#### Conference/Seminar contributions (\* marks talks)

- \* Repeatability of evolution is additively affected by environmental and demographic variation. ESEB 2025.
- Eco-evolutionary feedbacks in *C. elegans*-microbe interactions. ESEB 2025.
- \* De zoektocht naar buitenaards leven – KNAW symposium 2025. *De (on)begrensde mogelijkheden van leven op Aarde*. <https://www.youtube.com/watch?v=R03uAJhf8Ak>
- \*(Keynote) The role of behavior in shaping emergent ecological and evolutionary properties. Netherlands Society for Behavioral Biology. 2024
- \* Eco-evolutionary dynamics in *C. elegans*-microbe interactions. WUR Lab of Genetics seminar 2024
- \* Eco-evolutionary dynamics in *C. elegans*-microbe interactions. EvoWorm 2024
- \* Boundaries on evolutionary predictions from selection and drift. NWO LIFE 2024
- \* Limits to evolutionary predictability through uncertainty in selection and drift. NLSEB 2024
- \* The predictability of evolution. Lorentz Workshop at Snellius : Evolution of Complex Contemporary Life. 2024
- \*The predictability of evolution. Origins Center Conference 2023.
- \*Universal patterns in speciation dynamics. NLSEB 2023
- \* Synthesizing causes and consequences of variation across sexual communication systems. NWO LIFE 2023
- \* Variation and function in sexual signal components. Entomology Day 2022
- Experimental evolution of a pheromone signal. ESEB 2022
- \*Predictability of experimental evolution in *C. elegans*. NLSEB 2022
- \*Experimental host-microbiome evolution in *C. elegans*. NWO LIFE 2022
- \*Genetic, phenotypic, and biogeographic perspectives on population divergence in a Hawaiian cricket. ESEB Satellite symposium on reproductive isolation, 2021.
- \*The selection response of a multicomponent sexual signal. Evolution (SSE) 2021.
- \*Plasticity, variation, and constraint in sex pheromone signals. NLSEB 2021.
- \*Convergent gut microbiota as a signature of non-adaptive speciation. NAEM 2021.
- \*The predictability of genetic adaption. Origins Center Conference 2021.
- \*The evolution of sex pheromones. Netherlands Entomological Society meeting, Ede, The Netherlands, 2019.
- Parallel genetics of repeated sexual signal divergence. European Society for Evolutionary Biology, Turku, Finland, 2019.
- Evolution of sex pheromone communication in response to artificial selection. NLSEB, Ede, The Netherlands, 2019.
- \*A rapid radiation of flightless crickets in Hawaii. Netherlands Entomological Society meeting, Ede, The Netherlands, 2018

Parallel Genetic Architectures for a Behavioral Speciation Phenotype. European Society for Evolutionary Biology, Montpellier, France, 2018.

\*Convergence and constraints in behavioral isolation: a tale of two crickets. NBB symposium 2017, Ithaca, NY, USA, 8 December 2017

\*The genomic architecture of repeated sexual signal divergence. Evolution, Portland (OR), 26 June 2017.

The geographic context of speciation in crickets. Evolution, Portland (OR), 26 June 2017.

\*Sexual selection, population divergence, and the genomic mosaic of local evolutionary histories. EvoDay, Lab of Ornithology, Cornell University. Ithaca NY, USA 11 May 2017.

\*Speciation islands? Behavioral and genomic divergence along a spatio-temporal cline. Cornell University NBB symposium 2016. Ithaca NY, USA, 9 December 2016.

\* Population genetics becomes population genomics: what the 'omics era means for evolutionary biology. Berlin Center for Genomics and Biodiversity Research (BeGenDiv), Berlin, Germany, 23 September 2015.

\*Divergence in acoustic and chemical mate signaling genes after speciation with gene flow in field crickets. Berlin Center for Genomics and Biodiversity Research (BeGenDiv), Berlin, Germany, 23 September 2015.

Patterns of transcriptomic divergence and demographic history in field crickets. Candidate genes for the evolution of reproductive isolation in the presence of gene flow. European Society for Evolutionary Biology, Lausanne, Switzerland, 2015.

\*The genetic architecture of calling song and song preference traits in *Gryllus rubens* and *G. texensis*. Patterns of inheritance and phenotypic integration. Orthoptheran Bioacoustics Meeting, Zingst, Germany, 2015.

Premating reproductive isolation between two closely related cricket species. European Society for Evolutionary Biology, Lisbon, Portugal, 2013.
